 COMPANY**  
 OLD TOWN, MAINE, U. S. A.

## THE CANOE OF THE AMERICAN INDIAN

**D**ID you ever think that of all the primitive implements of the Indian none for water use has survived civilization in a recognizable form except his canoe? The test of time and the ingenuity of the white man have found nothing of comparable size superior to his model of a water craft, be it for pleasure or for service on stream, river, lake or ocean bay. Until, however, there was substituted cotton duck or canvas for his birch-bark covering, the use of canoes was restricted to those localities where the materials could be easily obtained, and where there were Indian workmen to apply them. Improvisation of a better covering and improvement in methods of construction now provide the canvas-covered canoe, but fundamentally in lines and model the water craft of the red man survives.

As this modern canoe had its origin in the haunts of the "OLD TOWN INDIANS" it is appropriate that it should be named "OLD TOWN CANOE." These same Indians still retain their cleverness in canoe building and the number of them in our employ seems to give to our canoes something of the old Indian romance as felt by Hiawatha in the lines by Longfellow:

"I a light canoe will build me,  
That will float upon the water,  
Like a yellow leaf in Autumn,  
Like a yellow water lily."

The "birch bark" (canoe), like the tomahawk and wigwam is now scarcely known except in Indian tradition and museums, but the "OLD TOWN CANOE" will perpetuate gratitude to the Indian for his invention of this typically American water craft. The simplicity of an Indian's life is visualized to us when we understand how easy it is to own and maintain a canoe.

It is the adaptability of the canoe which makes it so universally needed, and for some purposes, like cruising in the far reaches of our north country, no other craft can be used. Best of all, the canoe furnishes means of enjoying that waterway or body of water which lies nearest each of us, and whether it be lake or pond, stream, river or bay, the pleasure of water travel is not denied. An afternoon's paddle can take one far from the toils and turmoil of the town, and affords association with nature than which nothing is more conducive to quiet thoughts, a happy mind, a good appetite and resultant red corpuscles. He who ever on a summer's night has dipped his paddle and pushed far out under the still moonlight to drift in the full freedom of quiet and appreciation of nature's composure, realizes that the canoe is the tangible cause for all his wonder and delight, and the charm of canoeing once partaken of holds its victim enthralled ever afterwards. It is in cruising, however, that the canoeist reaches the height of his hopes; and to follow the ways traversed by the native red man a century and more back, to live by a camp-fire as he lived, and to make shelter wherever night overtakes, is to understand the independence of the savage and know the truth of self-reliance.

To learn to paddle is as easy as to learn to row, and the extreme simplicity in the means of guiding and propelling a canoe is what has made its use so popular and widespread. If you spend your summer near the water and have not experienced the exhilaration of canoeing, you have a joy to look forward to. This year you can double the charm of your outing and make an inseparable, ever-ready and inexpensive companion by acquiring an "OLD TOWN CANOE."

## GRADES of "Old Town Canoes and Boats"

"OLD TOWN CANOES AND BOATS" (except all wood boats) are made with few exceptions in two grades, known as "A. A." and "C. S.", the distinction between the two being in the selection of materials, the wood trimming and the finish. There is also a difference in price.

### A. A. GRADE

In designating A. A. Grade the purchaser assures himself of our very best production. All materials are of the highest order procurable. Planking and ribs are carefully selected, of uniform color, and without any imperfections; gunwales, decks, thwarts and seat frames are of straight-grained, selected mahogany, bang plates of brass, and fastenings throughout of copper and brass, — a very few necessary galvanized nails are used in gunwales and stems to hold ribs and planking.

Every detail in the matching of woods and in finish is accomplished with painstaking care to the end that the completed product will permit of no adverse criticism. This grade will satisfy the most exacting.

### C. S. GRADE

This grade provides a hardwood and spruce trimmed canoe of thorough construction, good finish, and with the omission of no detail essential to strength, serviceableness and long wear. The wood parts are subject to slight discolorations, small knots, etc. Planking and ribs are of cedar; gunwales of spruce; decks, thwarts and seat frames of hardwood (boat seats of spruce); bang plates of brass, and fastenings throughout of brass, copper and galvanized iron. Canvas of the same quality as in A. A. Grade, filled and waterproofed in the same manner.

For general use where superior finish is not desired C. S. Grade provides a common-sense canoe of guaranteed dependability.

*Quiet water, the right companion and an "Old Town Canoe"*

# SPECIFICATIONS of "Old Town Canoes"

## RIBS

Of white cedar, the toughest lightweight wood obtainable, 5/16 inch thick, 2 inches wide spaced 1 1/2 inches apart. Ends tapered.

## PLANKING

Of finest quality straight-grained red cedar 5/32 inch thick. Smooth laid in long lengths with tight joints.

## OPEN GUNWALES

All canoes and boats are stocked with newest type of open gunwales, which make washing out easier.

## DECKS

Sixteen inches long except "Otca" model (page 5).

## STEMS

Ash or oak, straight grained.

## SEATS AND THWARTS

Seats have wood frames with cane filling. Bow seat dropped on 4-inch bolts. Stern seat and thwarts bolted close to gunwales. Thwarts located and spaced as shown in illustration of each model. No middle thwart in

16 foot canoes but furnished with extra charge (\$2.00) if specified when order is placed. Seats and thwarts easily removable.

## KEEL

On all stock models except those shown otherwise on pages 9 and 10. Depth of keel 7/8 inch. It runs full length of canoe and well under bang plates.

## CANVAS

No. 8 seamless canvas on all "OLD TOWN CANOES" except the "50-pound" (page 10) has No. 10 to provide lightness. Be cautious about buying a 16 foot or longer canoe which hasn't No. 8 canvas on it. Boats, dinghies and outboard motor craft beginning page 14 have No. 6 canvas, also Guide's Special Model, page 9.

## FILLER

The canvas is made waterproof and smooth, with all trace of texture removed by a hard-drying, flint-like filler.

## FINISH

The woodwork inside and outside is finished in natural wood color with three coats of waterproof varnish. The canvas is finished to an enamel-like surface of high gloss with waterproof varnish. Variety in color with name, striping and similar decorations is available. See page 41 for particulars.

DIAGRAM of the "Old Town Canoe"

## "Old Town 'OTCA MODEL' Canoe"

The "Otca" model is the widest, deepest and roomiest. These features make it the steadiest, safest and most capa-

*A real Penobscot Indian Pageant in "Old Town Canoes"*

acious canoe that we build. The floor is flat and wide, and carried far into the ends. The sides are convex, thus producing a handsome tumble-home. The 20" long decks with low coaming or deck-end finish are practical, pleasing and distinctive. This model is not designed primarily for speed but for comfort, safety and fine appearance.

It is the sort of canoe one always takes pride in owning because of its true lines and details of fine craftsmanship. Equally at home on stream, lake or ocean, it never fails to give its owner and occupants a feeling of complete canoe joy.

The model is suited for use under any conditions anywhere. It paddles easily, will carry the largest load comfortably, can handle a maximum sail area. Illustrated with floor rack which is included in price of all A. A. Grade canoes but is extra in C. S. Grade. (See Extras, page 41.) Stock color Dark Green. Other colors, etc., page 35.

**In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.**

## “Old Town ‘H. W. MODEL’ Canoe”

Instead of a perfectly flat floor the H. W. Model tends toward the shape of the well-known salt water yawl boat below the water line. This shape gives more draft and hence greater steadiness in windy waters. A general utility model, somewhat faster under the paddle than the Otca Model, sturdy and handsome in appearance—the kind of canoe that is always ready for any use.

Extra fullness at bow and stern enables this model to ride large waves instead of cutting through them as in the case of a canoe with sharp ends. For cruising, carrying heavy loads, for use on large rivers, lakes, ponds and salt water, this is a superior canoe. Has speedy graceful lines. The ends curve with that nicety given by the Indians to their bark canoes. Excellent with sail.

It has all the essentials in lines and quality to make any owner proud. All parts are shaped for lightness coupled with ample allowance for strength. No excess weight. Hunters and others who do portaging will appreciate this. Stock color Dark Green. Other colors, page 35. Extras, page 41. The 16 foot length is a favorite with Boy Scouts and for them may be supplied with thwarts in place of seats and with low ends as in the 50-lb. Model (page 10)—no change in price.

*Sturdiness, steadiness and ease in handling are outstanding*

**In Writing Order, Give Length Grade Model Color and Price. Also Extras and Equipment.**

## "Old Town 'SPONSON' Canoe"

If you keep away from the water because of distrust of the ordinary rowboat or canoe, try this canoe. Boys and men, because of its safety, use it even more readily than the

*Shows difficulty of upsetting*

regular canoe. Girls' summer camps have scores of them. It is named "Sponson" from the air chambers built out each side and extending from stem to stern. Amidships the sponsons are 4" wide, 5" deep. This ample size doubles the air space and buoyancy as compared with

smaller designs. They add about 25 lbs. in weight. They are clear of the water and touch the water only when the canoe is careened.

Stock color Dark Green. Extras page 41. Stock Sponson Canoes built on H. W. Model. Sponsons built to order (three weeks) on any models for \$40.00, except 20 ft. canoe (page 9) cost is \$45.00. Rowlocks can be added for use separately or at the same time with paddles. Rowing equipment page 38.

*Shows buoyancy when swamped*

*A fore and aft rig with 45 ft. and 55 ft. sails*

*It will take more weight to push this Sponson under*

*Hail, hail, the gang's all here!*

*18 ft. Sponson with 55 ft. sail and rudder*

*18 ft. Sponson submerged but still sailing*

## "Old Town 'GUIDE'S SPECIAL MODEL' Canoe"

This canoe is for the use of guides and sportsmen. Has broad lines through its entire length to give steadiness and carrying capacity and a flat floor far into the ends to make it float light and go easily over

the shallow places. The ends are low to lessen wind resistance — a feature which experienced hunters and sportsmen regard as very essential. A fast, steady canoe that is never cranky. Many directors of boys' summer camps select the "Guide's Special" for their entire flotilla. Stock color Dark Green. Heavy No. 6 Canvas.

An 18 ft. Guide's Model in the background — 15 ft. 50-Lb. to the left

The A. A. Grade is finished on the canvas with Japan Color and Marine Varnish to give high gloss the same as on other models. The C. S. Grade is now customarily finished with a painted surface on the canvas to provide a less high gloss as desired by many fishermen, hunters and sportsmen. The finish is tough and enduring and of fine appearance. Stock color Dark Green.

This model regularly has keel, which, however, can be omitted if order so specifies, but without price allowance. Half ribs supplied between the regular ribs for \$6.00. Extras page 41.

Length Extreme	Width Extreme	Depth Amidships	Approx. Weight	Approx. Weight Packed	For export (see note p. 36)		A. A. Grade (see p. 3) with keel		C. S. Grade (see p. 3) with keel

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

## "Old Town '50-LB. MODEL' Canoe"

The 15 foot length is a canoe of exceptional capacity, not burdensome in portaging and capable of carrying one man and much equipment or two men with reasonable equipment. On preceding page is picture portraying loading capacity of this model. It is used by timber cruisers, fire wardens, hunters and sportsmen and as a general purpose canoe by young and old alike. Extra light construction is employed. Ribs are  $\frac{1}{4}$ " thick, spaced  $1\frac{1}{2}$ " apart, planking  $\frac{1}{8}$ " thick, canvas No. 10. All lengths have middle carrying thwart and seats as illustrated. The 11 foot and 13 foot lengths are limited in stability and capacity by their shortness but broad beam carried full into the ends gives unusual steadiness.

Stock color Dark Green. Other colors, see page 35. Extras page 41. A few users prefer keel omitted. (Allow 20 days. No change in price.) This 15 foot model with keel is a prime favorite with Boy Scouts, and for them usually thwarts are supplied in place of seats (no extra charge).

*A lightweight "Old Town" makes portaging easier*

Length Extreme	Width Extreme	Depth Amidships	Approx. Weight	Approx. Weight Packed	For export (see note p. 36)		A. A. Grade (see p. 3) with keel		C. S. Grade (see p. 3) with keel

*In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.*

## "Old Town 'YANKEE MODEL' Canoe"

*A beautiful water scene with an "Old Town" for the centerpiece*

Steadiness comes nearly as much from length as from width. Consequently the regular seventeen and eighteen footers are steadier than the regular sixteen footers. To meet the demand for a sixteen foot canoe with as near as possible the stability of the longer canoes this wide "Yankee" model was designed. We recommend it to those who let canoes, and prefer the sixteen foot length, because it is so broad it can be entrusted to those who are not accustomed to handling water craft. Its popularity is widespread and many old experienced canoeists are numbered among its friends.

It will behave admirably and vie with any canoe in beauty. Is an excellent fishing canoe and for carrying large loads where a short length canoe is desired.

Extras page 41. Stock color Dark Green.

**In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.**

## "Old Town"

## SAILING EQUIPMENT

This outfit is adaptable to any canoe. It consists of Lateen sail, completely rigged with mast and booms and tackle for hoisting and lowering, Mast Seat (illustrated page 37) and Step for supporting mast, and Leeboards which serve same purpose as centerboard. Each leeboard blade is fastened by pivot bolt, with tension lever nut, to heavy Manganese bronze angle bracket, which in turn is screwed to cross arm. The cross arm is adjustable to varying locations in the canoe or to canoes of different beams and is securely held to the gunwales by hook bolts with thumb nuts. The entire outfit

can be installed instantly and when not in use can be taken apart and stored in the canoe.

The blades swing on the pivot bolts like pendulums, and enough tension should be put on the lever nuts to hold blades perpendicularly but permit of their swinging up if obstruction is encountered under water. All metal parts brass or bronze.

Steering may be done with rudder as illustrated or with regular paddle. Prices quoted on other types and sizes of sails if description and measurements are given. Any items sold separately at the prices shown.

Mast Seat and Step (installed in place of bow seat) (or separate)	\$4.50	Lateen Sail complete, area about 45 sq. ft.	\$32.00
Rudder complete with fastenings	9.00	Lateen Sail complete, area about 55 sq. ft.	36.00
Leeboards (same style fits both regular and sponson canoes)	15.00	Lateen Sail complete, area about 65 sq. ft.	42.00
Lateen Sail complete, area about 40 sq. ft. (Boy Scout size)	30.00	Lateen Sail complete, area about 75 sq. ft.	49.00

## “Old Town ‘WAR’ Canoe”

Boys' and girls' summer camps and canoe clubs use this canoe for team paddling and group cruising. No water craft is better for team training. It is a pretty sight to see a War canoe crew driving with rhythmic strokes at top speed. Equipped with floor rack, keel, outside stems,

30 inch decks. No. 6 canvas. Stock color Dark Green. Other colors (page 35) for shipment 20 days. Some boys' and girls' camps build a large part of their aquatic program on the team work which is made possible by a fleet of War canoes.

Length	Width	Depth	App. Weight	App. Weight Packed	App. Weight Grated	App. Cubic Meas.	Capacity	Open Spruce Gunwales, C.S. Grade	Code Word

## “Old Town” CANVAS-COVERED, DOUBLE-END BOAT

This is a practical, comfortable, all purpose rowboat. Steady, easy to row, seaworthy and handsome in appearance. It is unexcelled for a fisherman's rowboat. Ideal for women and children. It has heavy No. 6 canvas over cedar ribs and planking. The same construction as used in our canoes. Always water-tight. A great favorite at

boys' and girls' and adults summer camps. Stock color Dark Green. Other colors page 35. Oars and paddles page 38. A boat you'll enjoy owning and using. Back rests, two pairs rowlocks, painter ring and floor rack included.

## SQUARE-END PADDLING CANOE

*15' Square End Paddling Canoe*

*18' Square End Paddling Canoe, with Sponsons, Amidship Seat, and Rowlocks*

There is a very definite demand from sportsmen and fishermen for a canoe which can be used with paddle or oars and motor. This model meets that need and hundreds of users are getting satisfaction from this all purpose craft. Shape and general dimensions follow the regular 20 ft. Guide's Special canoe except the lengths are shorter, namely 15 ft. and 18 ft. and have square stern. Motors of 2½ H.P. to 6 H.P. give four to nine miles an hour. Stock color Dark Green. Equipped with half ribs, outside stem, painter

ring. Number 6 canvas.

The 18 ft. is pictured with sponsons (described page 7) which can be supplied on either length canoe at extra cost of \$40.00. Also it is pictured with stationary board rowing seat amidship costing \$5.00 and brass rowlocks costing \$5.50. These items can be included or omitted in either length canoe. Oars priced page 38. Suggest 6½ ft. length. Prices and weights below do not include sponsons or amidship seat or rowlocks. For action picture see page 32.

*In Writing Order, Give Length. Also Extras and Equipment.*

## "Old Town" SPORTBOAT

It is entirely practicable to carry on top of an automobile any canoe or boat of reasonable size. Even 20 ft. canoes and boats up to 200 pounds are easily transported on the top of coupes and of course more easily on sedans. In the case of heavy craft the problem is more one of lifting the boat in place on the car than of the ability of the car to carry the load. So we have designed a light weight able seaworthy boat in about the same weight range as large canoes. Its lightness will take most of the effort out of loading on top of an automobile. At the same time the boat contains ample rigidity to stand the strain of outboard motor. Generally a motor of 2 to 5 H. P. is used. Boat is sturdily braced with natural grown knees and has a keel and keelson. Seats are posted to keelson. Width and depth are greater than usually found in boats of this type and add materially to the stability, seaworthiness and carrying capacity.

Built only in A.A. Grade to assure highest grade materials picked for strength and lightness. Ribs and planking are

of cedar,  $\frac{1}{4}$  inch and  $\frac{1}{8}$  inch thickness respectively. Canvas is light weight Number 10. Trimmings of mahogany. Has brass rowlocks, half ribs, and painter ring. All fastenings brass. Stock color Dark Green. For oars see page 38. For action picture see page 32.

*Five horse power pushing five hundred pounds*

*In Writing Order, Give Length, Model, Color and Price. Also Extras and Equipment.*

## TRANSPORTATION BY AUTOMOBILE

*Sportboat on the water after . . . . .*

No longer need you be uncertain about finding a boat or canoe when you take to the water — carry it along with you. It is simple and safe to load your craft on an automobile top and speed along without further thought of it. Some protective material to cushion boat and prevent chafing car top and with rope or straps to hold boat in position makes completely safe such methods of transportation.

Picture (above right) shows rubber vacuum cup Utility Carrier having two rubber cups at each end of each cross

*. . . . . bringing it so easily*

bar with straps to hold boat to cross bar and safety straps with rubber insulated hooks to fit under eave rail of car doorway. This Utility Carrier regularly is in two widths — one for canoes 41 inches across the gunwales (price \$9.00) and one for boats 55 inches across gunwales (price \$10.00).

The least expensive items for loading are blankets or other suitable material for cushioning and straps or ropes reaching from each end of canoe or boat down to front and rear bumpers as shown on page 35.

## "Old Town" SQUARE STERN SPONSON MODEL

For an all-round general-purpose motor boat of the greatest possible safety and seaworthiness, this model has won the admiration of thousands of users. It has unusual capacity and will carry all who can be seated comfortably. The sponsons or air chambers alongside provide an assurance of safety beyond what no water craft can contain without this feature. Canvas covered construction is ideally suited to boats in and out of water frequently as when used week ends at summer camps or transported by automobile from place to place. Canvas boats will never leak from such usage. The construction is rigid thruout with seats braced by knees and posted to keelson. No vibration or shaking. Modified V-bottom. Speeds eight to seventeen miles with 2½ H.P. to 9 H.P. motors. Shallow draft. Very seaworthy. Handsome appearance.

Stock color Dark Green. Other colors page 35. Price includes seats as illustrated, painter ring, tool drawer under stern seat, floor rack, outside stem and one pair rowlocks. High-grade spruce oars with leather

buttons to prevent oars from slipping thru rowlocks, priced on page 38. Waterproof canvas cover with Lift-the-Dot fasteners and bows (illustrated and priced page 19). Same model without sponsons on next page. See page 19 for illustration of 14 ft. For price of long deck as pictured below see page 19. Shape of stern and complete outline same as small illustration next page (18).

## “Old Town” SQUARE STERN MODEL

The omission of sponsons lessens the weight of this model (16 ft. illus.) as compared with the boat on the preceding page. This change gives advantages which some users like, and particularly there is increase in speed. An admirable, light-weight, always-tight boat for sportsmen, fishermen and general utility purposes. Fast enough with a light-weight motor and performs beautifully with 2½ to 9 H.P. motors. Speeds from nine to seventeen miles. It

responds instantaneously to the helm, is quick in getting under way, and travels without shake or vibration. Seats are braced to the gunwales with natural-grown knees and posted to keelson. This makes the boat rigid in the extreme and assures long life. Construction follows our highest standard. Every detail is taken care of with a view to providing the utmost value for a fast, safe, dry boat at a reasonable price.

Stock color Dark Green. Other colors page 35. Price includes seats as illustrated, painter ring, tool drawer under stern seat, floor rack, outside stem, and a pair of rowlocks. High-grade spruce oars with leather buttons to prevent oars from slipping through rowlocks, priced on page 38. Waterproof Canvas Covers and 48 inch Long Deck illustrated and priced on next page (19) where also are pictures of 12 ft. and 14 ft. Square Sterns. See page 32 for action picture.

*In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.*

12 Ft. "Old Town" SQUARE STERN MODEL is here shown. Complete specifications page 18. While short in length this boat is steady and seaworthy because of broad beam. Built to fill the needs so often expressed by sportsmen, fishermen and campers for a good short practical boat easy to handle in and out of the water and on an automobile, at the same time being safe, capacious and reasonably fast with motor and easy to row. A  $2\frac{1}{2}$  H.P. to 9 H.P. motor will give six to seventeen miles with two people. Waterproof canvas cover \$27.00.

14 Ft. "Old Town" SQUARE STERN MODEL with 48 in. Long Deck. This deck adds \$35.00 to price of boat shown on preceding page. Crated for shipment extra (page 36)—crating necessary to protect Long Deck. Deck is both practical and artistic—will hold weight of person. General information this model preceding page. Available with sponsons (page 17) and without Long Deck. Best for use with  $2\frac{1}{2}$  H.P. to 9 H.P. motors but will perform beautifully with larger motors and is extremely fast. Waterproof canvas cover for this model or square stern sponson model \$29.00. This Deck in 12 ft. and 16 ft. of this model at same price.

"WATERPROOF CANVAS COVER" on 16 ft. square stern sponson model. Wood bows sewed in cover and reaching across gunwales hold canvas in roof position. Lift-the-Dor fasteners and draw rope secure cover along sides. Price of cover for this 16 ft. model or 16 ft. Square Stern Model, \$31.50. Hood made on any cover to go over motor attached to stern increases cost \$4.00. In ordering give make and size of motor. Cover made of high grade, soft flexible material, khaki color.

## "Old Town" ROUND-BOTTOM WOOD ROWBOAT

15 ft.

This is a rugged sturdy boat of a shape and construction which so many boat users like. Here are smooth lines for easy rowing and handling—roominess for comfort—ample depth and width for seaworthiness—and high grade workmanship for staunchness and beauty of appearance. Campers, cottage owners and fishermen like this boat for its all round usefulness. It rows easily. It is well balanced so that one, two, three or even four people can occupy the fifteen foot length, and up to three people the twelve footer. While designed for easy rowing the ample beam amidships, moderately flat floor and good width at stern enable use of outboard motors up to not exceeding 10 H.P.

Ribs are ash or oak to which is secured by brass screws strip cedar planking of  $\frac{3}{16}$ " thickness and  $1\frac{1}{4}$ " width. Joints are laid in marine compound and the strips of plank-

ing are tightly compressed to eliminate leaking. Rowlocks (two pairs) and all fastenings are galvanized iron except screws holding planking are brass as stated above. Open gunwales. Stock color usually white outside and contrasting color inside. Usually 7 ft. oars are supplied in plain ash or spruce, or in spruce, varnished and leathered (priced page 38).

*Part of the fleet of over 200 of our 15 ft. Round Bottom Boats purchased for the Parks of the Commonwealth of Pennsylvania*

## "Old Town" CANVAS-COVERED DINGHY OR YACHT TENDER

This Dinghy (9 foot length illustrated above) is always watertight. Can be left on deck or hung from the davits for days without affecting its non-leak canvas covering. Will carry a large load, handle easily and tow well. It has the same style of construction as in our canoes, — cedar ribs and planking covered with heavy No. 6 canvas. Stern and transom built strong and modeled to carry outboard motor. Canvas is enameled White in stock but any color furnished in twenty days.

Regular equipment includes one pair rowlocks attached, davit eyes, towing ring and bilge keels. Mahogany is used for gunwales, deck, and stern. For oars see prices page 38. Prices of dinghies include white finish on canvas and cotton rope bumper in groove in gunwales. See next page for some illustrations of dinghies.

*11 1/2' Dinghy*

*11 1/2' Dinghy*

## "Old Town" SAILING DINGHY

This dinghy is illustrated completely equipped for sailing. The sails are easily removable and after furling will stow inside. Equipped with oarlocks so is usable as rowboat. Stern is strongly braced for outboard motors. Price includes centerboard, rudder with tiller, mast ring and step, 56ft. area dinghy sail, wire side stays, 24 in. mahogany

deck, white color, cotton rope bumper around gunwales and crating for shipment. Other colors no extra charge. Centerboard well does not interfere with seating. A 72 ft. area sail in place of 56 ft. area costs \$20.00 extra. Action pictures show 72 ft. sail. All sails have reefing points for reducing area.

## "Old Town" LAPSTRAKE SAIL BOAT

Here is a boat to delight the heart of a sailor! It's a joy to watch it perform and still more of a joy to handle the helm. Hull has lines for speed and ample beam for stability. The sail area is properly sized for speed and easy handling. For the beginner or the seasoned sailor there is the same joy of possession as the ownership of a fine automobile.

Planking is  $\frac{1}{2}$ " white pine laid in lapstrake construction and securely fastened to ash or oak ribs and frame. All fastenings and fittings are brass or galvanized. Center-

board is wood lowered and lifted with bronze friction lever—very easy to operate. Sail is Marconi type about 68 ft. area held to mast and boom with slides. Jib has about 22 ft. area. Total area about 90 ft. Height of mast  $17\frac{1}{2}$  feet. Boat has 53 inch deck solidly built, also full length side decking and all covered with canvas finished in blue color. Exterior of hull finished white—interior painted light gray. Waterproof khaki canvas cover for cockpit costs \$23.00. Cushions complete for all seats \$36.00.

*In Writing Order, Give Length, Model and Price.*

## "Old Town" FLAT-BOTTOM WOODEN BOAT

This is a well-modeled, inexpensive skiff or flat-bottomed boat, strongly made for rough, hard wear. It is very seaworthy. Just the right boat for fishing. Excellent for use at boys' and girls' camps and at sporting camps for general all-round use. Requires very little care. Sure to give you your money's worth if used only one season and would then probably cost you less than you could rent a boat for. With reasonable care will last for years. Stern built strong for use with outboard motor. Any number find this boat very speedy with all of the standard motors of 2 H.P. to 10 H.P. Built with open gunwales.

This boat, being all wood, is subject to drying out and shrinking when kept in dry storage for any length of time. When put into the water it may at first leak, but quickly the joints tighten and close up so that leaking then stops and the boat becomes perfectly dry. In this respect it differs from the canvas-covered boats which always are water-tight. It is built like all standard flat-bottom wood boats, but with much stronger cleated sides. For the

service intended and the price it suits hundreds of users. Fish well can be supplied under the middle seat for \$15.00 extra. Has removable slatted floor rack.

Built of white pine, painted in various colors, usually Brown, Green or Gray outside, Gray or other suitable color inside. Plain spruce and ash oars, also varnished spruce oars, priced on page 38. Usual lengths, 7 foot and 7½ foot. North River rowlocks (pin thru oar) at no extra charge.

*This is a load that any boat would envy*

Length Extreme	Width Extreme	Depth Amidships	Approx. Weight	Approx. Weight Packed	Telegraph Code Word	Price Packed

*In Writing Order, Give Length. Also Extras and Equipment.*

## "Old Town" FLAT-BOTTOM WOODEN BOATS

20 ft.

12 ft.

These boats follow the same lines and construction as the 15 foot on preceding page. The 12 foot length easily operates with oars and can be used with 2 H.P. to 5 H.P. outboard motors. The 10 foot boat is designed for use only with oars — not recommended for motors.

Construction, details, color, etc. same as for 15 foot (page 25), except that 10 foot boat is not supplied with floor rack. Standard open galvanized rowlocks or if you prefer North River rowlocks or round rowlocks on any boat. For plain ash and spruce oars and varnished spruce oars, see page 38. Generally 6½ foot or 7 foot oars are recommended.

In Writing Order Give Length. Also Extras and Equipment.

## “Old Town” LAPSTRAKE BOATS

*14 ft. Lapstrake Square Stern*

*14 ft. Lapstrake Rowboat*

Here are shown two models of Lapstrake Cedar Boats— one designed for motors even up to 17 H.P., and the other for rowing but suitable also for small motors up to 5 H.P. Construction of each boat is in the highest possible grade. Measurements below will show difference in widths amidships and at sterns. These are beautifully built boats of surpassing quality and performance.

Planking is red cedar  $\frac{1}{2}$  inch thick in narrow widths, brass fastened to ribs and frame of ash. Transom is mahog-

any. Entire boat is finished in natural wood with varnish. Equipped with floor boards, rowlocks and painter ring. For \$35.00 a 48 in. long deck as illustrated page 19 may be added to Lapstrake Square Stern Boat. Speeds for Square Stern Boat range from 9 miles with a 5 H.P. motor up to 20 miles with a 17 H.P. motor. We recommend 5 H.P. to 10 H.P. motors. Depth of bow of Square Stern Boat is 29 inches. For action pictures see page 32.

*In Writing Order, Give Length and Model. Also Extras and Equipment.*

## "Old Town" 15 FT. LAPSTRAKE OUTBOARD BOAT

This boat is an enlargement of our 14 ft. Lapstrake Square Stern (page 27) to meet a demand for a more capacious craft. With ample depth and width it is prepared to meet severe weather conditions. Being particularly deep at bow assures ability to fight wave and storm. Deck is 54" long. Boat is supplied with wide cross seats having folding backs. Has full length seats at stern on both sides and one tool drawer. A beautiful boat of all purpose use for families or for fishermen.

Planking is  $\frac{1}{2}$ " thick red cedar fastened to ribs and

frame of ash. Gunwales, transom and deck are mahogany or ash. Finished natural wood with varnish. For painting outside planking white add \$15.00. Equipped with floor boards and painter eye. Motors recommended are 5 H.P. to 17 H.P., which give speeds of 8 miles to 20 miles per hour. Waterproof khaki cover costs \$38.00. Spruce oars, usually 7 foot or  $7\frac{1}{2}$  foot, priced on page 38. Cushions and other accessories as shown for All Wood Sea Model (page 30) are also available for this boat. Depth of bow is 34 inches.

Length Extreme	Width Extreme	Width Stern	Depth Amidships	Approx. Weight	Approx. Weight Crated	Price Crated	Telegraph Code Word
15 ft. Lapstrake Outboard Boat	60 in.	50 in.	23 in.	350 lbs.	575 lbs.	\$400.00	Motstrak

## "Old Town" ALL-WOOD SEA MODEL

This All-Wood Sea Model holds the forefront of popularity. Outstanding new features are refinement of detail and sturdier construction together with more ample measurements of width and depth. Its performance always draws praise. Flare to the bows keeps the boat dry. Seating arrangement is generous and comfortable.

The floor frame and transom are built extra heavy to stand the stress and power of the larger motors. Smooth

laid narrow  $\frac{3}{16}$  in. cedar planking is brass fastened to oak or ash ribs. Deck, outwales, side decking, coaming and transom are mahogany or ash. Two side stern seats and one tool drawer. Interior finished natural with spar varnish. Planking outside painted white. Other colors if desired. Mooring bitt and chocks included in prices of boats.

Speed is a feature and following table gives estimate of speeds with two people aboard. Figures under H.P. show approximate miles per hour.

## "Old Town" ALL-WOOD SEA MODEL

The ALL-WOOD SEA MODEL and OCEANBOAT (Page 31) frequently are equipped with extras as shown in the above picture. With them nothing is left for the imagination to desire to make a boat complete in every detail except the motor. Size of motor will depend on the amount you wish to invest and the power you prefer. Estimated speeds which may assist in determining H.P. of motor appear on page 29. Prices opposite are based on the 18 ft. All-Wood Sea Model. All items are likewise suitable for the 14 ft. length and 16 ft. length and also the 16 ft. Oceanboat on following page. We are always prepared to give information and prices about outboard motors suitable for the various boats.

*A wide white wake trails this Oceanboat*

**16 Ft. ALL-WOOD OCEANBOAT** is an enlarged Sea Model. It has the same general appearance and identical details of construction of the All-Wood Sea Model but nine inches more beam and greater depth. There is a very large demand for a boat in 16 ft. length of unusual capaciousness and capable of carrying the largest motors under the extremest kind of unfavorable weather conditions. This boat as far as we know is the biggest 16 ft. boat in the market and is in a class by itself for com-

pletteness, good looks and performance. The extra beam makes the boat come out of the water quicker and plane better with the larger motors. With a 17 H.P. motor boat will plane nicely at a speed of seventeen miles, with a 22 H.P. motor at about twenty-two miles and with a 33 H.P. motor at about thirty miles. Extra equipment at same prices as 16 ft. Sea Model (pages 29, 30 and below). Has two side seats at stern, with one tool drawer, mooring bitt and chocks.

	Width Extreme	Depth Amidships	Width Stern	Length Deck	Approx. Weight	Approx. Weight Crated	Approx. Cubic Measurements	Price Crated	Code Word

**WATERPROOF CANVAS COVER** is here illustrated on a 16 ft. All-Wood Sea Model. Fabric is the highest grade material, soft and easy to fold and completely waterproof and mildew proof—color khaki. Lift-the-Dot fasteners are spaced along the sides and at transom. In addition a cotton rope or puckering string permits of drawing the cover tightly

down. Over mooring bit and chocks there are placed hinged canvas lids which snap down over anchor rope. Same kind of cover is used on all Sea Models. Price for 14 ft. Boat, \$34.50; for 16 ft. Boat, \$36.00; for 18 ft. Boat, \$42.00; for Oceanboat, \$39.00. Hood can be built into cover to go over motor on stern for \$4.00 additional.

## "Old Town" ROWING SKIFF

12 ft. Rowing Skiff

12 ft. Rowing Skiff

Generations of boat builders evolved this skiff. Style of manufacture dates back over eighty years but the design has been successively improved to meet modern requirements so that now we have an up-to-date model of rugged construction, enduring materials and seaworthy design for sturdy use on ocean, lake, pond, river or stream.

These boats are lapstrake construction—sometimes called clinker built. Bottom boards are native pine  $1\frac{3}{16}$  in. thick. Side boards are native pine  $\frac{9}{16}$  in. thick. Frames, knees

and gunwales are oak or ash. All metal fastenings are galvanized. All boats are equipped with floor racks. Floor racks weigh from 18 lbs. to 28 lbs. and weights of boats as shown include floor racks. Outside of boats painted yacht white. Inside pea green. Floor racks and seats are dark green. Rowing skiff is equipped with 2 pairs galvanized rowlocks. Plain ash and spruce oars priced on page 38. Usual lengths 7 foot and  $7\frac{1}{2}$  foot.

Length Extreme	Approx. Width	Approx. Width Stern	Approx. Depth	Approx. Weight	Approx. Packed Weights	Price	Telegraph Code Word

## "Old Town" OUTBOARD SKIFF

14 ft. Outboard Skiff

14 ft. Outboard Skiff

This Outboard Skiff is constructed from the same materials and in the same way and painted the same as the Rowing Skiff (page 33). The boats are staunch and able and are built as light as is consistent with seaworthiness, long life and safety. Motors of  $2\frac{1}{2}$  H.P. to 16 H.P. give

speeds of 5 miles to 20 miles per hour. Floor racks weigh from 22 to 37 lbs. and are included in weights of boats as below. They are also included in prices of boats and in our opinion are indispensable. 16 ft. length has three cross seats. Each boat equipped with one pair rowlocks.

## INFORMATION FOR ORDERING "OLD TOWN CANOES"

### HOW TO PLACE ORDER

All canoes and boats are priced in plain single colors completely ready for use except for equipment. For colors see reference below. For paddles and other equipment see page 38. For extras see page 41. In ordering be sure to give length, grade, model, color, price, also extras and equipment.

### COLORS

Dark Green is the standard stock color and in this color we aim to be ready to ship any stock model canoe or boat on the day order reaches us. We intend also to carry a stock of canoes colored Bright Red and Dark Red and a reasonable number in the various color designs. During rush season it is well to give second choice of color. Any special color will be furnished to order, if sample is supplied, at usually no added charge except that white costs \$6.00 extra. The usual colors are shown in colored illustrations on inside back cover. For special decoration, striping, names, etc., see page 41.

### SPECIAL CANOES

When canoes are wanted varying in width or depth from stock models it is necessary to build them as special orders, requiring about five weeks' time and extra cost. Our varied assortment of models provides a particular canoe for almost every use but we are glad to quote prices on special canoes on receipt of specifications.

### TERMS

Remittance in full should accompany order in form of certified check, bank draft, express or post-office money order, payable to Old Town Canoe Co. Order with remittance should be addressed to us at Old Town, Maine, U. S. A. If less than the full amount accompanies order, the payment or deposit with order should be at least one quarter of the cost. The balance due us will then be collected after shipment by means of a bank draft with Bill of Lading attached in the case of freight shipments or by means of C.O.D. in the case of express and parcel post shipments. If shipment is to go under draft kindly give name of bank where you wish draft collected. The name of your bank is desired only for your convenience. We guarantee complete satisfaction and for our responsibility refer you to any bank.

*When cruising an Old Town never worries about the load*

*A complete picnic outfit*

## INFORMATION FOR ORDERING "OLD TOWN CANOES"

### PACKING AND SHIPPING

Prices quoted for canoes and boats include packing in loose hay and burlap or crating and delivering to the transportation company in Old Town. For crating, unless otherwise shown, there will be a reasonable charge based on actual labor and material. The usual cost of crating each canoe is \$12.00,—for crating boat \$14.00 except when included in price.

Shipments are generally made by freight. Express charges are three to four times as much as freight charges.

### EXPORT

Almost invariably steamship lines require that canoes for export be crated. The charge for export crating is same as above. Frequently canoes for export can be crated in pairs with a reduction of about 40% in the cubic measurements of canoes crated singly.

## DEALERS

In all cities and other canoeing centers representative dealers stock "OLD TOWN CANOES." You can place your order with your dealer and at the same prices as catalogued plus transportation charges. If you wish to know the name of our agent in your locality or the one nearest to you please write us for it. If there isn't an agent to supply you, send your order direct to us and get immediate shipment.

**CUSHIONS** are here pictured which we make for "Old Town Canoes and Boats" and for general use. Each single box cushion is made to comply with Government requirements to qualify as a life preserver. All materials are new. The filling is new Kapok and no adulterant of any kind is used. Cushions are covered with new artificial leather in a variety of colors and patterns. Popular colors are red, blue, brown, green and gray. Unless otherwise stipulated, cushions are supplied in color to match boat. Samples of fabrics will be sent on request (indicate color preferred). We cannot guarantee to duplicate colors and patterns as manufacturers continually change fabrics. Close matches always possible. Above pictures show only the popular sizes and styles. We can always make to order and will gladly quote on special requirements. In ordering cushions to fit boat seats, give length and name of boat and length and width of seats.

#### PACK BASKET

Indian pattern hand made Pack Basket for hunters, fishermen, hikers. Made of selected pliable pounded ash strips. Readily moulds itself to back of carrier. Superior to canvas pack which always seems to shrink and sag. Web straps are easy on shoulders. Baskets weigh from 2 $\frac{3}{4}$  lbs. to 4 $\frac{1}{2}$  lbs. depending on size. Straps weigh  $\frac{3}{4}$  lb. Some prefer basket encased in waterproof khaki cloth covering which weighs about 1 lb.

	Regular Pack Basket	Covered Pack Basket
15" High	\$7.00	\$11.50
18" High	7.50	12.00
20" High	8.00	12.50

## CARE AND REFINISHING OF CANOES AND BOATS

TO insure continued good appearance of your canoe it should, whenever possible if not in use, be kept in a dry place under shelter. If left out of doors on shore place it bottom side up to keep out the rain and dampness. If water is allowed to stay unnecessarily long inside canoe when not in use there may result sweating and blistering of outside canoe finish.

To locate hidden leak in canvas pour considerable water inside canoe and watch for it to come thru. White lead, glue, or Ambroid Cement can be used to stop the leak.

Every season or two, depending on the service it has had, it should be refinished so as to afford protection to the canvas and woodwork from wear and exposure. A new coat of varnish will brighten it up and make it look like new. The same materials that we use, in quantities sufficient for one canoe, cost as below. Complete directions accompany materials. Should you wish advice as to care and maintenance or repair of your canoe we will gladly give you all the information we can.

### FOR CANOES AND CANVAS COVERED BOATS

1 qt. Canoe Enamel (except white) specify color . . . . .	\$2.25
1 qt. Marine Spar Varnish for woodwork . . . . .	2.25

--	------

*A light weight motor saves time and muscle*

Jiffy Outboard Motor Bracket for canoes, weight 7 lbs. . . . \$7.00  
Will take any make motor up to 5 H.P.

## CARE OF ALL-WOOD BOATS

All-wood boats should not be stored in heated rooms. Heat causes wood to shrink. If heated rooms are unavoidable keep open pans or pails of water in the heated room or in the boat to keep the air moist. Each season new coatings of paint and varnish will probably be needed. Our standard refinishing materials sufficient for one boat cost as follows:

1 qt. Enamel Paint for wood boats, specify color . . . . .	\$2.25
2 qts. Marine Varnish, for interior and trimmings . . . . .	4.50

## BOOKS ABOUT CANOES AND CANOEING

Canoeing, Merit Badges Series—Boy Scouts, 58 pages . . . . .	\$ .25
The Canoe—Its Selection, Care and Use—Pinkerton; published by Macmillan Co. . . . .	1.25
Exploring the Little Rivers of New Jersey—Cawley . . . . .	2.00
Most States maintain departments to dispense information about canoe trips such as Conservation Dept., State of New York, Albany, N. Y.; Maine Development Comm., Augusta, Maine.	

## PICTURES

A large number of "OLD TOWN" owners have sent us pictures of their canoes and boats in service, some of which are shown in this catalog. If you have been fortunate in getting some good pictures we should be very glad to receive copies to add to our collection.

## NAMES, MONOGRAMS, STRIPINGS FOR CANOES

Shaded gold transfer letters  $2\frac{1}{2}$  inches high are regularly used for applying names to canoes. Generally the name is placed on both sides of bow or on left bow and right stern. Names also put on in colors in plain lettering. Monogram of your description or to sketch in either gold or colors at costs shown below. Usually letters 4 inches high are used for monograms.

Quotations on special lettering furnished on receipt of designs or descriptions.

The embellishment of canoes by monograms, names,

stripes, etc., is increasing in favor every season. It permits of giving your canoe a touch of individuality obtainable in no other way.

In the colored illustrations shown inside of back cover we have endeavored to help you find a coloring that you may like. The various designs permit of different coloring combinations adaptable to your preference. When colors vary from our standard shades in the illustrations we like to have samples sent for our guidance. Due time allowance should be given to execute these special colorings.

Name in $2\frac{1}{2}$ in. Gold transfer letters, per letter . . . . .	\$ .25	*Gold Stripe, $\frac{1}{2}$ in. turned down . . . . .	\$10.00
