Marvel for Beauty, Speed and Comfort

HERE it is. The Outboard motor canoe you have been looking for. With certain points in mind the Kennebec designers have produced a canoe that is not only light, swift, strong and seaworthy but combines graceful lines with ample roominess and many refinements not furnished with any other canoe of this type.

The hull of the "Joy-Boy" is cedar planked and canvas covered to which the sponsons are so shaped that they are wholly concealed but are so constructed that they give extra buoyancy. Along the sponsons are full length rub rails which in addition to the protection afforded add beauty to the canoe.

The canoe is finished in bright red with dark green border and light gray deck. The coaming, rub rails and the inside of the canoe are all finished natural.

The splendid lines and sturdy construction of this canoe make it an especially snappy looking craft, exceptionally seaworthy, and add to the speed and ease of handling without in any way lessening the roominess and comfort such a craft should furnish.

Note the pictures in this folder which can only give a faint idea of the beauty and exclusive features of this exceptional craft.

Its lightness, roominess, added speed, ease of handling and seaworthiness make the "Joy-Boy" an ideal craft for pleasure, sport and family use.
