TREMBLAY CANOES LIMITED  
40, St PAUL STREET ST. FELICIEN, P.Q.

Tremblay Canoes Ltd is the oldest manufacturer of canvas covered canoes in Canada and the continued acceptance and preference for these canoes by trappers, hunters, prospectors, papermills, lumbering companies, forestry and other Government Depts is an indication of their quality and endurance.

The preference for Tremblay Canoes by the Indians, Eskimos and others whose daily livelihood depends on a good canoe as well as the preference by boys & girls camps where canoes are really tested is another indication of the excellent design, construction, durability, stability and safety of Tremblay Canoes.

While we make 30 different models & sizes of canoes we make only one grade, using the finest No. 1 select materials and the best heavy duty canvas or verolite covering.

On short order we can make a canoe to meet any special specifications. Our workmen, most of whom have been with the company for many years are expert craftsmen who take pride in an excellent product.

### THE TREMBLAY WARRANTY

THE FOLLOWING GUARANTEE MADE BY TREMBLAY CANOES LTD  
PROTECTS YOU, THE PURCHASER

If, on receipt of a canoe or boat, you find it to be defective in any way, except by damage in transportation or after one season's use, defects should develop that were not at first noticeable, Tremblay Canoes Ltd will remedy the defects, or, if they are such that they cannot be remedied, will replace the boat or canoe if it is returned to St. Felicien, freight prepaid. No other condition or terms of warranty will be valid unless by written consent of the senior officer of the Company.

#### Verolite-

The new Plastic Coated canvas is an Exclusive with Tremblay Canoes. The use of Verolite is the first major advance made in canoe construction since painted canvas was first introduced sixty-five years ago.

Verolite eliminates exterior maintenance and periodic repainting. Verolite covered canoes therefore do not take on added weight with the passing years. **Verolite is more durable and scuff resistant than painted canvas and it is lighter.**

Verolite is available on Chibougamau canoes 14' - 17' in red, green, and orange, also on Wacanichi canoes 15' and 16' in red, green or orange.

Verolite is available on all other models and sizes up to 20' in green, and orange only, except on Saguenay 20' which still has to be covered with painted canvas.

Verolite is not affected by heat or cold. It has been thoroughly tested for several years and is now the expressed preference of knowledgeable buyers including dealers, camp operators and outfitters. Verolite is available in Red, Green or Orange.

## CHIBOUGAMAU CANOES

(pointed)

The canoe for family pleasure, for fishermen, trappers, prospectors, campers, outfitters, or forestry Departments.

The canoe for anyone who wants a correctly designed No 1 Quality canoe. Built to ride rough or fast water. Each length has the correct beam to insure stability and safety.

Bow and stern seats are standard equipment and either rawhide laced seats or slat style seats may be ordered.

**MONTAGNAIS (Flatwide)**  
An ideal cartop canoe. Light – good beam – very stable & safe canoe for the fisherman, or duck Hunter.

(Square stern)

**RADISSON (Square stern)**  
This is a specially designed canoe – used by hunters or for freighting where it is often necessary to operate in shallow water. The stern is designed to permit the propeller of the outboard motor to continue to operate even when the depth of water is only sufficient to float the canoe. Especially adaptable to fast water – Slat Style Stern seat standard equipment.

### RADISSON – Moose Canoe

RADISSON	18' x 42" x 16"	Square stern 2000	110	Verolite, stern slats seat 4 thwarts, keel	3/8" thick x 2 1/4" wide, spaced 1 1/4" apart	Green or orange verolite outside, inside urethane lacquer
----------	-----------------	-------------------	-----	--	---	---

**Verolite:** The modern canoe covering exclusive with Tremblay. A plastic coated canvas in red, green or orange, reduces canoe weights by approximately 5 lbs. Requires no periodic re-painting thus Verolite canoes do not take on added weight with the years. Verolite is much more damage resistant than standard painted canvas.<sup>(1)</sup> Verolite is available up to 20' on all models canoes. Verolite is the one major improvement in canoe construction in the past 50 years.

The red canvas is not guaranteed to keep his color.
