**Tremblay**  
canoes LTEE.  
LTD.

973 Boul. Hamel Blvd. St. Félicien, Qué. Canada

Tremblay Canoes Ltd is the oldest manufacturer of canvas covered canoes in Canada and the continued acceptance and preference for these canoes by trappers, hunters, prospectors, papermills, lumbering companies, forestry and other Government Depts is an indication of their quality and endurance.

The preference for Tremblay Canoes by the Indians, Eskimos and others whose daily livelihood depends on a good canoe, as well as the preference by boys & girls. Summer camps where canoes are really tested is another indication of the excellent design, construction, durability, stability and safety of Tremblay Canoes.

While we make 22 different models & sizes of canoes we make only one grade, using the finest No. 1 select materials, and our exclusive verolite covering. To ensure delivery on the best selling models, we have eliminated from our line the rarely sought after sizes and styles.

On short order we can make a canoe to meet any special specifications. Our workmen, most of whom have been with the company for many years are expert craftsmen who take pride in an excellent product.

## CHIBOUGAMAU CANOES (pointed)

The canoe for family pleasure, for fishermen, trappers, prospectors, campers, forestry departments and white water enthusiasts.

The canoe for anyone who wants a correctly designed No 1 Quality canoe. Built to ride rough or fast water. Each length has the correct beam to insure stability and safety.

Bow and stern seats are standard equipment and either rawhide laced seats or slat style seats may be ordered.

Model Name	Length Beam Depth	Stern Design and Carrying Capacity	Net Weight Lbs	Canvas & Standard Equipment	Cedar Ribs Size and spacing	Finish
------------	-------------------	------------------------------------	----------------	-----------------------------	-----------------------------	--------

## WACANICHI CANOES (V. stern or Flat wide stern)

These canoes are used not only as Freighters but they are the choice of moose and deer hunters. They combine the utmost in carrying capacity with the lightest weight.

Slat style, stern seat standard equipment.

### V-STEM

### MOOSE (Square stern)

This is a specially designed canoe — used by hunters or for freighting where it is often necessary to operate in shallow water. The stern is designed to permit the propellor of the out-board motor to continue to operate even when the depth of water is only sufficient to float the canoe. Especially adaptable to fast water — Slat Style Stern seat standard equipment.

**Square stern:  
Optional  
on the  
Lachine 18'**

Model Name	Length Beam Depth	Stern Design and Carrying Capacity	Net Weight Lbs	H.P.	Canvas & Standard Equipment	Cedar Ribs Size and spacing	Finish
------------	-------------------	------------------------------------	----------------	------	-----------------------------	-----------------------------	--------

Inside finished with urethane lacquer.

### MISTASSINI — Freighter

The "Mistassini Freighter" was designed originally for use by the Forestry Depts. For years it has been used in log drives where sturdy durable boats are essential. One of the best boats for use in fast waters or for heavy loads. The choice of the wood and pulp drivers.

Used daily in Canada's arctic regions from coast to coast, where large freighters are a way of life.

## THE TREMBLAY WARRANTY

THE FOLLOWING GUARANTEE MADE BY TREMBLAY CANOES LTD  
PROTECTS YOU, THE PURCHASER

If, on receipt of a canoe or boat, you find it to be defective in any way, except by damage in transportation or after one season's use, defects should develop that were not at first noticeable, Tremblay Canoes Ltd will remedy the defects or, if they are such that they cannot be remedied, will replace the boat or canoe if it is returned to St. Felicien, freight prepaid. No other condition or terms of warranty will be valid unless by written consent of the senior officer of the Company.

The new Plastic Coated canvas is an Exclusive with Tremblay Canoes. The use of Verolite is the first major advance made in canoe construction since painted canvas was first introduced sixty-five years ago.

Verolite eliminates exterior maintenance and periodic repainting. Verolite covered canoes therefore do not take on added weight with the passing years.

Verolite is more durable and scuff resistant than painted canvas and it is lighter.

Verolite is available on Chibougamau canoes 14' — 17' in red, green, and orange, also on Wacanichi canoes 15' in red, green or orange. Verolite is available on all other models and sizes up to 24' in green, and orange only.

Verolite is not affected by heat or cold. It has been thoroughly tested for many years and is now the expressed preference of knowledgeable buyers including dealers, camp operators, wilderness excursion groups, white water enthusiasts and canoe specialty stores.

The red verolite is not guaranteed to keep its color.

Tremblay Canoes Ltd. does not guarantee the Verolite material against any acids, oils, greases, solvents or cleaning compounds to which the purchaser may subject the covering; nor any discoloring which may be caused by undetected chemicals or algae present in the water.

Tremblay Canoes have established a reputation for excellence in workmanship, and materials used, since 1914.

To continue to meet the ever increasing demand for Tremblay handcrafted canoes, we open in 1975 our new plant. Through improved production methods and the manufacturing area increased three fold, we can not only guarantee delivery but actually improve our already proven level of quality.

Applying the selected cedar planking on our Chibougamau style canoe.

Applying our newly designed rawhide seat.
